<b>FocusWriter</b>	FocusWriter is a fullscreen, distraction-free word processor designed to immerse you as much as possible in your work. The program auto saves your progress, and reloads the last files you had open to make it easy to jump back in during your next writing session, and has many other features that make it such that only one thing matters: your writing. It features hide-away Interface, themes, live statistics, spell checking, and document tabs.	Word processor	<b>Public Space</b>		MAC			

APPLICATION	DESCRIPTION	FIELDS	LOCATION	WIN	MAC	LINUX	CITRIX	
<b>Gaussian</b>	<a href="#">Gaussian</a> is the latest version of the series of electronic structure programs, used by chemists, chemical engineers, biochemists, physicists and other scientists worldwide. Starting from the fundamental laws of quantum mechanics, Gaussian predicts the energies, molecular structures, vibrational frequencies and molecular properties of molecules and reactions in a wide variety of chemical environments. Gaussian's models can be applied to both stable species and compounds which are difficult or impossible to observe experimentally (e.g., short-lived intermediates and transition structures).	Computational chemistry	<b>Public Space</b>	WIN			CITRIX	
<b>GaussView</b>	<a href="#">GaussView</a> is the most advanced and powerful graphical interface available for Gaussian. With GaussView, you can import or build the molecular structures that interest you, set up, launch, monitor and control Gaussian calculations, and retrieve and view the results, all without ever leaving the application.	Computational chemistry, chemistry modeling	<b>Public Space</b>	WIN			CITRIX	

APPLICATION	DESCRIPTION	FIELDS	LOCATION	WIN	MAC	LINUX	CITRIX
<b>GIMP</b>	<a href="#">GIMP</a> is an acronym for GNU Image Manipulation Program. It is a freely distributed program for such tasks as photo retouching, image composition and image authoring. It can be used as a simple paint program, an expert quality photo retouching program, an online batch processing system, a mass production image renderer, an image format converter, etc. GIMP is expandable and extensible. It is designed to be augmented with plug-ins and extensions to do just about anything.	Image editing	<b>Public Space</b>	WIN		LINUX	
<b>Git</b>	<a href="#">Git</a> is distributed version control system focused on speed, effectivity and real-world usability on large projects. Like most other modern version control systems, Git gives each developer a local copy of the entire development history, and changes are copied from one such repository to another. These changes are imported as additional development branches, and can be merged in the same way as a locally developed branch.	Computer programming	<b>Public Space</b>		MAC		

APPLICATION	DESCRIPTION	FIELDS	LOCATION	WIN	MAC	LINUX	CITRIX
<b>Google Earth</b>	<a href="#">Google Earth</a> lets you fly anywhere to view satellite imagery, maps, terrain, 3D buildings, galaxies in outer space, and the depths of the ocean. Explore rich geographical content; Search for business locations; See 3D buildings and add your own models; Visualize your GPS tracks and share with others; Dive beneath the surface of the ocean.	Geography, mapping	<b>Public Space</b>	WIN	MAC		
<b>GView</b>	<a href="#">GView</a> allows you to: Command-line viewing of image files (.bmp, .jpeg, .gif, .png, etc); Ability to zoom in on image areas; Ability to resize the image (larger or smaller) during runtime; Images automatically resize to best fit your screen's resolution.	Image viewing	<b>Public Space</b>	WIN			

APPLICATION	DESCRIPTION	FIELDS	LOCATION	WIN	MAC	LINUX	CITRIX	
<b>HLM</b>	In social research and other fields, research data often have a hierarchical structure. That is, the individual subjects of study may be classified in groups which themselves have qualities that influence the study. The <a href="#">HLM program</a> can fit models to outcome variables that generate a linear model with explanatory variables that account for variations at each level, utilizing variables specified at each level. HLM not only estimates model coefficients at each level, but it also predicts the random effects associated with each sampling unit at every level. While commonly used in education research due to the prevalence of hierarchical structures in data from this field, it is suitable for use with data from any research field that have a hierarchical structure.	Education, and other fields that use hierarchical data modeling	<b>Public Space</b>				CITRIX	
<b>HyperChem</b>	HyperChem includes molecular mechanics, molecular dynamics, and semi-empirical and ab-initio molecular orbital methods, as well as density functional theory. HyperChem is applicable to macro- & small molecules & is scriptable.	Computational chemistry					CITRIX	

APPLICATION	DESCRIPTION	FIELDS	LOCATION	WIN	MAC	LINUX	CITRIX	
<b>iLife Suite</b>	Organize photos by Faces and Places. Create photo books. Make a movie. Even learn to play music. See Apple site for <a href="#">more information</a> .	Image editing, video creation and editing, music creation and editing	<b>Public Space</b>		MAC			
<b>InkScape</b>	An Open Source vector graphics editor, with capabilities similar to Illustrator, CorelDraw, or Xara X, using the W3C standard Scalable Vector Graphics (SVG) file format. <a href="#">Inkscape</a> supports many advanced SVG features (markers, clones, alpha blending, etc.) and great care is taken in designing a streamlined interface. It is very easy to edit nodes, perform complex path operations, trace bitmaps and much more.	Image/graphics editor	<b>Public Space</b>		MAC

<b>TeXShop</b>	<a href="#">TeXShop</a> is a TeX previewer for Mac OS X, written in Cocoa. Since pdf is a native file format on OS X, TeXShop uses "pdftex" and "pdflatex" rather than "tex" and "latex" to typeset in its default configuration; these programs in the standard TeX Live distribution of TeX produce pdf output instead of dvi output.	Computer programming	<b>Public Space</b>		MAC			
<b>TextWrangler</b>	<a href="#">TextWrangler</a> is a powerful and richly featured tool for composing, modifying, and transforming text stored in plain-text files.	File creation, file management	<b>Public Space</b>		MAC			
<b>The Unarchiver</b>	<a href="#">The Unarchiver</a> is a much more capable replacement for "Archive Utility.app", the built-in archive unpacker program on Mac OS X. The Unarchiver is designed to handle many more formats than Archive Utility, and to better fit in with the design of the Finder. It can also handle filenames in foreign character sets, created with non-English versions of other operating systems.	File creation, file management	<b>Public Space</b>		MAC			
<b>Thunderbird</b>	Mozilla <a href="#">Thunderbird</a> is a free, open source, cross-platform e-mail and news client aimed at creating a web browser.	Web browser	<b>Public Space</b>		MAC
