DEADLINE: JUNE 17th

Department: Communication Sciences & Disorders
Course Title: Introduction to Communication Disorders
Course Number: SPEECH 155.01
Instructor: Reethee Antony
Email: rantony@mmm.edu

LAB 3: HEARING/ LANGUAGE DISORDERS

(You can choose to do your lab on hearing disorders or speech & language disorders. You must choose only one.)

Hearing disorders:

The report should include findings of your lab on pure tone audiometry. Pure tone audiometric findings must include the pure tone thresholds of your subject (250-8 KHz), pure tone averages, and diagnoses for both ears. You must justify the rationale for your diagnosis and the factors that were taken into consideration.

Organize your report in terms of objective, equipment used, stimulus & subject, procedure, method and discussion. Each group will have to submit one lab report. You can use the related supplementary materials posted on the website to help you write the report.

[OR]

Speech & Language disorders:

Choose a clinical activity from any of the chapters in the text book. You can find the clinical activity towards the end of each chapter.

Read the case study/activity and answer the questions provided. You must justify the rationale for all your answers. Each group will have to submit one lab report. You can use the text book or related supplementary materials posted on the website to help you answer the questions.
